

Adhithi Reddy Pullannagari

CSE (Artificial Intelligence & Machine Learning) Student · 3rd Year · Aspiring AI/ML Engineer

GitHub: github.com/adhithireddypullannagari | LinkedIn: [linkedin.com/in/adhithi-reddy-pullannagari-28525631a/](https://www.linkedin.com/in/adhithi-reddy-pullannagari-28525631a/)

PROFILE

Third-year Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, with hands-on experience through academic projects, hackathons, virtual job simulations and technology challenges. Interested in building practical AI/ML solutions using Python, machine learning, data preprocessing and web technologies.

EDUCATION

B.Tech — CSE (Artificial Intelligence & Machine Learning)	Pursuing 3rd Year	8.42 CGPA (as of 2nd year)
Intermediate		92%
10th — CBSE		82%

TECHNICAL SKILLS

Programming: Python, JavaScript **Web:** HTML, CSS, JavaScript **AI/ML:** Artificial Intelligence, Machine Learning, Data Preprocessing, Feature Engineering, Scikit-learn **Tools:** Git, GitHub, Streamlit **Areas:** NLP, RAG, Anomaly Detection, Regression, Classification, Clustering

PROJECTS

House Price Prediction

- Developed a machine-learning solution for predicting house prices using property-related features. Applied data preprocessing, feature selection and regression techniques.

Resume Ranking

- Built an AI/ML-based system to rank resumes according to job requirements. Explored text feature extraction, NLP and similarity-based techniques.

AI-Driven Anomaly Detection in Component Burn-In & Screening

- Developed as an SIH internal hackathon project to identify unusual component behavior using machine-learning-based anomaly detection, including Random Forest and Isolation Forest approaches.

Radiation Power Generator

- Worked on a prediction-oriented project exploring machine learning techniques for radiation power generation-related data.

AI Personal Finance Management and Decision Support System

- Ongoing project combining ML forecasting, anomaly detection, LLM/RAG concepts and Streamlit to support personal expense analysis and financial recommendations.

Agent Call Whysise

- Exploring an AI-agent concept focused on intelligent interaction, task assistance and agentic AI workflows.

CERTIFICATIONS & CREDENTIALS

Forage — 4 Virtual Job Simulations: BCG GenAI, Deloitte Data Analytics, Tata GenAI Powered Data Analytics, Vista AI in Action.

Other credentials: E-Business · LaunchPadX 2026 · Deloitte · Women Who Master Assignment · SIH Internal Hackathon participation.

HACKATHONS & COMPETITIONS

LaunchPadX — Sreenidhi: Participated in an innovation-focused hackathon and collaborated on a technology solution.

Smart India Hackathon — Internal: Worked on a real-world problem statement with an AI/ML-oriented solution.

RedRob: Participated in a technology/robotics-oriented challenge.

HackWithHyderabad 3.0: Participated in a collaborative hackathon focused on building and presenting a technology solution.

ADDITIONAL EXPERIENCE

Participated in college technology events, hackathons and innovation activities; collaborated in student teams and worked on practical problem-solving projects. Experience includes project coordination and presenting technical ideas.
